Operations Research Letters 12 (1992) 349–351
North-Holland

November 1992

Author Index to Volume 12 (1992)

The issue number is given in front of the page numbers

Abate, J. and W. Whitt, Numerical inversion of probability generating functions (4) 245–251
Abate, J. and W. Whitt, Solving probability transform functional equations for numerical inversion (5) 275–281
Antunes, C.H. and J.N. Clímaco, Sensitivity analysis in MCDM using the weight space (3) 187–196
Arian, Y. and Y. Levy, Algorithms for generalized round robin routing (5) 313–319
Armstrong, R.D. and Z. Jin, Solving linear bottleneck assignment problems via strong spanning trees (4) 179–199
Badrinath, V., *see* Mazumdar, R.R. (4) 263–270
Barahona, F., Separating from the dominant of the spanning tree polytope (4) 201–203
Bastian, M. and M. Volkmer, A perfect forward procedure for a single facility dynamic location/relocation problem (1) 11– 16
Billionnet, A. and A. Sutter, An efficient algorithm for the 3-satisfiability problem (1) 29– 36
Browne, S. and G. Weiss, Dynamic priority rules when polling with multiple parallel servers (3) 129–137
Cardoso, D.M. and J.C.N. Clímaco, The generalized simplex method (5) 337–348
Chen, F. and Y.-S. Zheng, Waiting time distribution in (T, S) inventory systems (3) 145–151
Cheng, D.W., Second order properties in a tandem queue with general blocking (3) 139–144
Chu, C., Efficient heuristics to minimize total flow time with release dates (5) 321–330
Clímaco, J.C.N., *see* Cardoso, D.M. (5) 337–348
Clímaco, J.N., *see* Antunes, C.H. (3) 187–196
den Hertog, D., C. Roos and T. Terlaky, A build-up variant of the logarithmic barrier method for LP (3) 181–186
Fülöp, J. and M. Prill, On the minimax approximation in the class of the univariate piecewise constant functions (5) 307–312
Gallego, G., D. Shaw and D. Simchi-Levi, The complexity of the staggering problem, and other classical inventory problems (1) 47– 52
Grover, L.K., Local search and the local structure of NP-complete problems (4) 235–243
Guillemin, F., *see* Mazumdar, R.R. (4) 263–270
Gulledge, T.R., *see* Ringuest, J.L. (1) 53– 58
Gupta, D., On the economic lot scheduling problem with backlogging: The common cycle approach (2) 101–109
Hasegawa, T., *see* Takine, T. (2) 97– 81
Hassin, R., Algorithms for the minimum cost circulation problem based on maximizing the mean improvement (4) 227–233
Hellstrand, J., T. Larsson and A. Migdalas, A characterization of the uncapacitated network design polytope (3) 159–163
Hwang, F.K. and U.G. Rothblum, Generalization of an engineering principle (4) 197–199
Jin, Z., *see* Armstrong, R.D. (4) 179–199
Kalvelagen, E. and H. Tijms, ORSTAT: Software for operations research and statistics (2) 125–127
Kamburowski, J., Bounding the distribution of project duration in PERT networks (1) 17– 22
Kannurpatti, R., *see* Mazumdar, R.R. (4) 263–270
Keil, J.M., On the complexity of scheduling tasks with discrete starting times (5) 293–295
Kohli, R. and R. Krishnamurti, A total-value greedy heuristic for the integer knapsack problem (2) 65– 71
Krishnamurti, R., *see* Kohli, R. (2) 65– 71
Kumar, A., On the average idle time and average queue length estimates in an M/M/1 queue (3) 153–157
